

Song Hong

Shanghai

PRACTICE AREAS

- Fintech
- Financial services and regulatory
- Technology, media and telecoms

PROFESSIONAL EXPERIENCE

Song's main practice areas include fintech, banking and finance, blockchain and cryptocurrencies, as well as corporate compliance matters related to the TMT (technology, media, and telecommunications) sector.

In the area of fintech, Song provides comprehensive compliance services for payment, wealth management, online-lending, consumer protection, AI, anti-fraud, data protection, and other areas for several well-known fintech companies and the fintech divisions of internet companies. He also provides legal services on behalf of investment institutions regarding investments in domestic and foreign fintech enterprises. His work includes research on major and complex legal issues, compliance analysis of innovative businesses, investee company due diligence, design and drafting of business systems, legal and compliance training and dissemination, and daily business compliance consulting.

In the area of banking and finance, Song serves multiple commercial banks, consumer finance companies, and online microloan companies. His work includes financial product structure design, due diligence for ABS, acquisition and restructuring of domestic and international licenses, review and drafting of transaction documents, and daily business compliance consulting.

In the area of blockchain and cryptocurrencies, Song provides services for several licensed cryptocurrency exchanges, stablecoin issuers, and blockchain companies both domestically and internationally, especially innovative business applications such as non-fungible and real-world asset tokens. His work in this field includes analyzing domestic and international regulatory policies, cross-border business compliance assessment, due diligence on invested businesses/cryptocurrencies, and daily business compliance consulting.

Song also provides compliance services for well-known companies in AI, cloud computing, e-commerce, gaming and other TMT fields. His work includes analysis of domestic and international regulatory policies, argumentation and evaluation of innovative business models, design and implementation of compliance plans, and daily business compliance consulting.

EDUCATION

Song graduated from Xiamen University with an LL.B. degree and an LL.M. degree in International Law.
